# WE KNOW PROJECTS

For a great many of our customers, projects are the lifeblood of their business. And we all know with costs so tight, the difference between a healthy project and one that's disastrous can come down to a few things going right... or a few things going wrong. At DSG... we know projects. Because we're involved with projects in the Plumbing, Automation, Electrical, Lighting, HVAC/R, Utility, Waterworks and Communications industry segments, we've just flat out been involved with more different types of projects and project situations than anyone else you could work with. During a typical year, we'll complete 85,000 project BID's and be actively involved with roughly 35,000 of those projects. And this experience goes a long way to ensuring your project is a healthy one. Here's a small sample of recent projects...

- Lighthouse Senior Living Center  
West Fargo, ND  
*Electrical*
- Chart Industries  
La Crosse, WI  
*Plumbing & Mechanical*
- Mayo Clinic Health System  
Rochester, MN  
*Plumbing, Electrical & Lighting*
- Organic Valley  
La Farge, WI  
*Plumbing, Mechanical & Electrical*
- Helena Regional Airport  
Helena, MT  
*Plumbing & Mechanical*
- Mni Waste' Water Company  
Eagle Butte, SD  
*Waterworks*
- Prairie Heights Church  
West Fargo, ND  
*Electrical*
- City of Graceville  
Graceville, MN  
*Waterworks (Metering)*
- Chandler Feed Company

*Electrical and Automation*
- Chief Agri/Industrial Group  
Kearney, NE  
*Automation*
- Al's Concrete Plant  
La Crescent, MN  
*HVAC*
- East Central Energy  
Braham, MN  
*Utility & Lighting*

# PROJECT MANAGEMENT

## QUOTATIONS

Every successful projects starts with a timely and thorough project quote. Our Quotations and Project Specialists are experienced enough to know what it takes to provide accurate and thorough bids so contractors can meet the specs, timelines, and budgets for their customers' projects.

## SMART ORDER DELIVERY LOGISTICS

We've learned over the 1000's of projects we work with, there's much more to a project than just getting materials to the job site on time. While many others simply deliver materials, we organize your material together based on the logical flow for each specific project, which minimizes order handling. Then we stage the material orders to coincide with the different phases of the project and schedule deliveries off these phases – including material by floor and room if the scope calls for it. Our Smart Order Delivery Logistics minimizes excess inventory at the project site and dramatically reduces material handling.

### ***On-Site Trailers***

*Keep your productive crew members on the job site instead of running to get more parts and materials, DSG can save you time and resources.*

## DESIGN LAYOUT CAPABILITIES

Our design services help customers address a variety of situations that can arise with their projects. From lighting design that optimizes energy efficiency, to HVAC & hydronics layouts, we are part of making sure projects meet all their goals.

## PROJECT SITE INVENTORY

Depending on the scope of the project, DSG's On-Site-Trailers or Job Boxes could be perfect for enhancing material flow and security. Trailer layouts can be set up for specific projects, and we can manage both trailers and job boxes as mini warehouses with material flow based replenishment. With both, it's a great way to have secure access to materials when and where you need them – minimizing delays and improving productivity.

### **Job Box Storage**

*On-site job boxes from DSG provide the parts and products you need – where you need them.*

## **BARCODE ADVANTAGE**

DSG has a unique and simple barcoding system that can be a significant labor saver depending on the scope of your project. We can customize a system of barcodes unique to each customer that, with the use of a common mobile device, helps make ordering faster and managing on-site inventory easier. This tool can be used in virtually any material storage area, as well as could be a component of DSG's On-Site-Trailer or Job Box program.

## **THE EXTRAS**

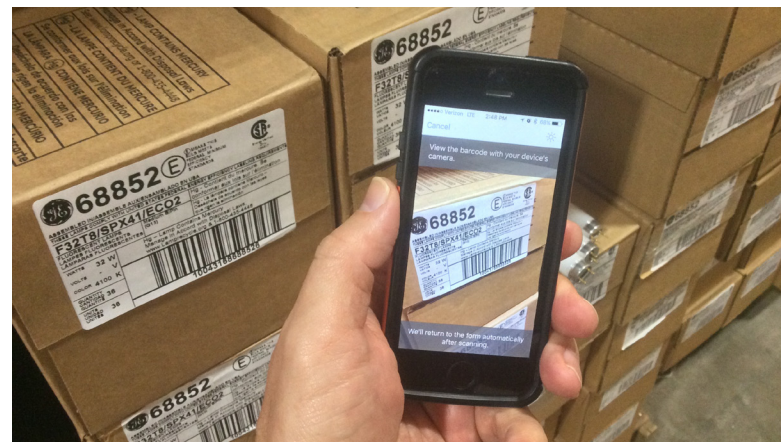

Because of the wide range of projects we've been involved with, we can draw off this know-how to handle a variety of unique situations with your project. From energy audits, to site evaluations and mid-project walk-throughs, to cutting, spooling, paralleling reels and adding pullers for building wire, to technical and administrative support throughout a project – DSG's employee owners will be there every step of the way to ensure your project goes as smooth as possible.

## **THE "AFTER-PROJECT"**

When the project is "done", often it's not really done. Many times the matter of returning excess or unused material remains. While this process can be a headache for you, DSG has worked hard on streamlining this process as part of its Customer Service Guarantee program so it's handled quickly and accurately and the cash gets applied when and where it belongs ...now the project is done!

### **DSG Lighting Design Services**

*Using the most advanced 3D rendering software, DSG can give you a glimpse of what your lighting future looks like.*

**Colored Wire Distribution Center**  
 With more than 2,500 reels, labor-saving accessories  
 and one of the fastest turnaround times in the business,  
 DSG provides you with a complete wire-cutting solution  
 to help you to save time and money on the job site.

**THE Power OF We AT DSG**

## HERE TO ASSIST YOU

People always make the difference, and this absolutely holds true when working with DSG's employee owner project specialists. They have a unique blend of smarts and "street" savviness, with many of them spending substantial time previously in their careers in the field directly involved with projects. So when you choose DSG as your project partner for materials, you truly are getting the best of both worlds: a team that knows it AND has done it.

**DSG Employee Owners**  
 Dozens of project specialists are available throughout all DSG locations to help you with your project from start to end.

THE Power OF We AT DSG

ISO 9001

## DSG CONNECT

One of the biggest challenges with projects is getting a handle on material flow to make sure everything is ordered and scheduled for site delivery when the project crews need it. DSG Connect offers robust account management system that allows estimators to retrieve and import quotes and orders quickly, and it also allows project managers and bookkeepers to streamline their workflow with easy material order progress tracking. And this information is available 24 x 7 x 365.
